

St. Paul's Primary School

BELFAST

#BelfastHealthyCity

We joined forces...

Belfast
A World Health Organization
Healthy City

Proposal: Part 1

- ❖ We would really appreciate more bins for our local community to tackle the issue of littering and dog fouling.
- ❖ St. Paul's Primary School is located in the heart of the community. We promise to lead by example and help clean up our local area, making it safe for everyone, especially young children who play and travel to school.

We are united to improve our Health & Safety!

Litter Issue

Help us fix this growing problem of litter & dog fouling!

Currently we only have 3 bins in the local community.

We would like more bins at these designated key areas

Lift it, Bin it!

We are keeping our promise to maintain our local area!

Join Us

Will you join our fight against litter & support us?

Proposal: Part 2

- ❖ We would really appreciate the introduction of **Zebra Crossings** to make it safer for children crossing the road.
- ❖ St. Paul's Primary School is located at the top of a narrow street. There is a lot of traffic during peak times, which is extremely dangerous for children. The addition of Zebra crossings would ensure safety for both children and adults.

Dangerous Traffic

Help us stay safe walking to and from school...

Traffic

The footpaths are not WIDE enough!

Currently we have no Zebra Crossings

We would like Zebra Crossings at these designated points

Stay Safe
